## 4) BFcocon model «Pizza»\*. EN/LTF certified

*Our lightest version, specially designed for hike and flight travels and competitions.*

- Big, stable aerodynamic tail
- Frontal reserve container for a parachute, mounted on head carabiners
- Get-up system on carabines. (a system invented by Bogdan 5 years ago to use get-up on carabiners without buckles. now this system is used on many harnesses of other brands)
- Standard size inflatable protector.
- Big trunk and easy access to the tread compartment (ideal for a bivouac)

***\*This model has an identical design with the "Medium" model, but is made of the lightest (such as 27 grams skytex fabric) and thinner materials. This allows you to achieve extremely low weight, but the resource of such a suspension is lower than that of other versions.***

### Price 990 euro

***Included carabines, inflatable protector, front reserve container, speed bar, bag in the form of a protector for bivouac flights.***

- ***Pizza version*** (from fabric skytex 27d)

# BF reserve

Made in EU

*A simple, lightweight, reliable parachute for the safety of your airborne missions.  
Very fast opening thanks to the minimum number of sections and lines.*

**Materials:**

**Fabric** - DDT or Skytex rescue fabric 30 g/m

**Lines** - Liros dyneema rescue lime 1.3; 3.2 mm

**Riser** - Liros dyneema D-pro 5mm

**Price 490 euro\***

*\*Price after receiving the EN certificate (expected in March) 690 euros.*

The size M parachute has successfully passed the descent test and the container para test. We expect to pass the load test in February.

We also did an internal load test. It was a parachute drop with a load of 100 kg from a tandem paraglider, then acceleration of the load to 140 km / h and a sharp opening.

| Size                 | 23                 | 27         |
|----------------------|--------------------|------------|
